

5 Courses

Java Basics: Selection and Iteration

Java Basic Structures: Arrays, Strings, and Files

Java Object Basics: Functions, Recursion, and Objects

Object-Oriented Java: Inheritance and Encapsulation

Core Java

Jan 20, 2024

Anjali Desai

has successfully completed the online, non-credit Specialization

Programming in Java: A Hands-on Introduction

This specialization is intended for people without programming experience who seek to develop Java programming skills and learn about the underlying computer science concepts that will allow them to pick up other programming languages quickly. In these four courses, you will cover everything from fundamentals to object-oriented design. These topics will help prepare you to write anything from small programs to automate repetitive tasks to larger applications, giving you enough understanding of Java to tackle more specialized topics such as Data Science and Artificial Intelligence.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
